

Why use edilex contract templates?

Because they are...

...simple

Our contract templates use contractual standards, created by and exclusive to edilex, whose main feature is an addressing system (see chart), that allows a quick and orderly access to any provision they may contain..

...secure

Our contractual standards also enhance the security level of your contracts by imposing a consistent workflow that greatly reduces the risks of errors and omissions which are often the source of major litigation between the parties to an agreement.

...and comprehensive

Since it is much easier and more re-assuring to delete or adapt a provision than it is to draft a new one, you will appreciate the comprehensive set of general and contract specific provisions built into each of our contract templates allowing you to spend more time on tailoring the provisions that really matter to you.

Contractual addresses chart*

Identification and coordinates	
Identification of the parties	
Recitals	
0.00	Interprétation
1.00	Purpose
2.00	Consideration
